

Admin Panel – Functional Requirements

ID	Module	Requirement
ADM-01	Dashboard	KPIs, charts, recent submissions and pending actions.
ADM-02	Applications	Search, filter, sort, view and manage all nominations.
ADM-03	Verification	Mark eligible/ineligible, request clarification, add internal notes.
ADM-04	Status	Move applications through configurable workflow states.
ADM-05	Categories	Manage categories, descriptions, eligibility, questions and upload rules.
ADM-06	Jury	Create/manage jury members and category/entry assignments.
ADM-07	Scoring	Configure criteria, weights, scale and evaluation status.
ADM-08	Shortlisting	Shortlist entries and lock/unlock decisions.
ADM-09	Winners	Select/publish winners and manage winner profiles.
ADM-10	CMS	Edit public content, banners, dates, FAQs, jury profiles and contact details.
ADM-11	Reports	Export filtered data to CSV/Excel.
ADM-12	Users/Roles	Manage Admin, Verification and other approved roles.
ADM-13	Audit Log	Track sensitive actions and status changes.

Admin Dashboard – Suggested KPIs

- Total Registrations
- Total Nominations
- Draft Nominations
- Submitted Nominations
- Pending Verification
- Eligible Entries
- Jury Review Pending
- Shortlisted Entries
- Winners
- Category-wise application counts
- City/state-wise application counts

Recommended Initial Scoring Framework

Criterion	Suggested Weight	Description
Design Excellence	25%	Aesthetic quality, design thinking and functional excellence.
Creativity & Innovation	20%	Novel ideas, materials, technology or approach.
Functionality / User Experience	20%	Practicality, usability and response to occupants/users.
Sustainability	15%	Environmental responsibility, resource efficiency and relevant practices.
Overall Impact	20%	Distinctiveness, relevance, execution quality and overall contribution.

Note: Final criteria and weights must be approved by the management/jury before production. The scoring engine should remain configurable.

Application Status Workflow

Status	Meaning	Typical Owner
Draft	Applicant has started but not submitted.	Applicant
Submitted	Final submission received.	System
Under Verification	Admin is checking completeness/eligibility.	Verification Team
Eligible	Application passed verification.	Admin
Clarification Required	Applicant action or clarification is needed.	Admin / Applicant
Jury Review	Entry is available to assigned jury members.	Jury
Shortlisted	Entry has advanced to final stage.	Admin/Jury
Winner	Final winner selected.	Admin
Rejected / Disqualified	Entry not eligible or not selected.	Admin

CMS / Content Management

- Homepage hero/banner content
- Award description and about text
- Category names, descriptions and eligibility
- Nomination instructions
- Important dates
- Jury profiles
- FAQs
- Contact details
- Terms & Conditions
- Privacy Policy
- Winner profiles
- Announcement banners / alerts

Future Editions

The system should support a new award year without rebuilding the core application. Categories, dates, jury, content, questions and scoring criteria should be configurable.

Non-Functional Requirements

Area	Requirement
Responsive	Optimised for current desktop, tablet and mobile browsers.
Performance	Fast first load; images should be optimised and lazy-loaded where appropriate.
Scalability	Architecture should support growth in users, applications and media files.
Availability	Production hosting with monitoring and backup strategy.
Usability	Clear navigation, short forms, progress indicators and useful error messages.
Accessibility	Good contrast, semantic labels, keyboard-friendly controls and readable text.
Maintainability	Modular codebase and documented deployment/configuration.
SEO	Editable metadata, clean URLs, sitemap and indexability for public pages.
Analytics	Analytics integration subject to organiser approval and privacy requirements.
Browser Support	Current major Chrome, Edge, Firefox and Safari versions; mobile browsers.

SEO, Social Sharing & Discoverability

- SEO-friendly page titles and meta descriptions
- Open Graph / social sharing metadata
- Shareable category and award pages
- XML sitemap
- Structured internal linking
- Optimised images with alt text
- Clean, human-readable URLs

Recommended Development Phases

Phase	Workstream	Deliverables
Phase 1	Discovery & UX	Final requirements, sitemap, user journeys, wireframes, field matrix and design system.
Phase 2	Public Website	Home, About, Categories, Jury, Dates, FAQ, Contact, legal pages.
Phase 3	Nomination Portal	Registration, login, dashboard, dynamic forms, uploads, draft and submission.
Phase 4	Admin	Dashboard, applications, verification, categories, CMS, reports.
Phase 5	Jury	Jury login, assignments, scoring and evaluation workflow.
Phase 6	Winners & Launch	Winner management, publication, QA, security testing, deployment.

Suggested Internal Project Timeline

The development team should provide a detailed sprint plan after the BRD and UI/UX are approved. As a planning framework, the project can be divided into discovery, design, development, QA/UAT and launch gates.

Gate	Exit Criteria
Requirements Freeze	BRD, category matrix, form fields, workflow and legal requirements approved.
UI/UX Approval	Desktop/mobile screens and design system approved.
Development Complete	All agreed MVP modules implemented in staging.
QA Complete	Functional, responsive, security and upload tests passed.
UAT Sign-off	Kutchmitra team completes test scenarios and approves launch.
Production Launch	Domain, SSL, backups, analytics and monitoring active.

User Roles & Permissions

Role	Access
Public Visitor	View public pages, categories, FAQ, contact and nomination CTA.
Applicant	Register/login, create/edit drafts, submit nominations, view own submissions/status.
Verification Team	View assigned/all applications as permitted, verify eligibility, request clarification.
Admin	Full operational control including categories, applications, jury, CMS, reports and winners.
Super Admin	System-level access, role management and configuration.
Jury Member	Only assigned entries and their own evaluation forms.
