Q R

1. Document Control

Item	Details
Project	Kutchmitra Home & Decor Awards 2026 – Website & Nomination Portal
Primary Users	Public visitors, Nominees/Applicants, Verification Team, Admins, Jury Members
Platform	Responsive Web – Desktop, Tablet and Mobile
Core Objective	Digitise the complete award nomination, verification, evaluation, shortlisting and winner-management workflow.

1.1 Reference & Design Basis

We can take reference from Times of India Home & Decor Awards reference website. The reference site demonstrates a structured awards journey covering Home, About, Categories, Jury, FAQs, Contact, nomination CTA, timeline, evaluation methodology and nomination flow. We should use these as functional references without copying the TOI design, branding, text or proprietary content.

Reference website: <https://timesofindia.indiatimes.com/toi/homedecorawards>

1.2 Key Design Principle

Important

The product should NOT be developed as a simple contact form or Google-Form-style page. It should be architected as a scalable Award Management Portal with a public website, applicant dashboard, admin workflow, jury evaluation and winner management.

2. Overview

Kutchmitra is planning the Home & Decor Awards 2026 to recognise excellence in architecture, interior design, residential projects and related design disciplines. The website must attract nominees, explain the awards clearly, capture structured nominations and provide the organising team with a reliable backend to manage the entire award cycle.

The proposed system shall support the following end-to-end journey:

- Public discovery and award information
- Category browsing and eligibility guidance
- Applicant registration and login
- Category-wise / dynamic nomination forms
- Multi-step application with Save as Draft
- Image and document upload
- Application preview, declaration and final submission
- Unique nomination ID and acknowledgement
- Admin verification and status management
- Jury assignment and confidential scoring
- Shortlisting and winner selection
- Winner publication and profile management
- Reports, exports, notifications and audit trail

3. Project Objectives

ID	Objective
O1	Create a premium digital destination for Home & Decor Awards 2026.
O2	Make nomination submission simple, mobile-friendly and reliable.
O3	Capture structured project and professional data for evaluation.
O4	Reduce manual coordination through automated status updates and notifications.
O5	Provide administrators with complete control over categories, applications, jury and winners.
O6	Provide a secure, role-based environment for confidential jury evaluation.
O7	Build a reusable platform architecture that can support future award editions.

4. Scopes

Module	In Scope
Public Website	Home, About, Categories, Eligibility, Process, Jury, Important Dates, FAQs, Contact, Winners, Terms/Privacy.
Nomination Portal	Registration, login, category selection, dynamic forms, drafts, uploads, preview, declaration, submission, nomination ID.
Applicant Dashboard	Profile, draft nominations, submitted nominations, status, view/print acknowledgement.
Admin Panel	Dashboard, applications, verification, categories, content/CMS, jury, scoring, shortlisting, winners, reports.
Jury Portal	Secure login, assigned entries, project information, scoring, comments and submission of evaluation.
Notifications	Email; SMS/WhatsApp integration to be treated as configurable integration based on final vendor/API selection.
Reports	Category-wise, city-wise, status-wise, date-wise and applicant-wise reporting; CSV/Excel export.
Security	HTTPS, role-based access, secure authentication, upload validation, audit logs and backups.

5. Proposed Website / Portal Sitemap

Area	Page/Module	Purpose
Public	Home	Hero, award proposition, CTA, highlights, categories, timeline, jury teaser, FAQs, contact.
Public	About the Awards	Purpose, vision, recognition philosophy, organiser information.
Public	Award Categories	All categories with category detail pages.
Public	Eligibility & How to Nominate	Who can apply, requirements, process and guidelines.
Public	Jury	Jury profiles and evaluation approach.
Public	Important Dates	Nomination open/close, verification, jury, shortlist, awards ceremony.
Public	FAQs	Common nomination and award questions.
Public	Winners	Category-wise winners, profiles and project highlights after publication.
Public	Contact Us	Contact details and enquiry form.
Applicant	Register / Login	Account creation, verification and password recovery.
Applicant	My Dashboard	Drafts, submissions, statuses and profile.
Applicant	Nominate	Category selection and multi-step nomination wizard.
Admin	Admin Dashboard	KPIs, applications, status, category and activity summaries.
Admin	Application Management	Search, filter, view, verify, shortlist, notes and status.
Admin	Category Management	Add/edit/disable categories, criteria, questions and upload rules.
Admin	Jury Management	Jury accounts, category assignment and evaluation configuration.
Admin	Winner Management	Winner selection, content and publication.
Admin	CMS	Manage public website content.
Jury	Jury Dashboard	Assigned entries and evaluation workflow.

6. UI/UX & Visual Direction

The interface should translate the supplied Home & Decor Awards 2026 creative into a premium digital experience. The website should feel editorial, architectural and aspirational rather than like a generic event template.

Element	Direction
Primary palette	Navy / deep blue, gold, white and black, aligned to the supplied creative.
Typography	Modern, highly legible sans-serif for UI; display treatment may be used for award headings.
Visual language	Architecture, blueprints, interiors, residences, materials, design details and premium editorial photography.
CTA	Strong, consistent “Nominate Now” CTA throughout public pages.
Forms	Clean multi-step wizard, clear labels, inline validation and visible progress indicator.
Mobile	Mobile-first responsive layout; forms and upload controls must be comfortable on smartphones.
Accessibility	Good contrast, keyboard-friendly controls, descriptive labels and readable font sizes.

7. Award Categories – Initial 2026 Scope

1. Architect of the Year
2. Best Luxury Residence
3. Best Apartment Design
4. Best Renovation Project
5. Best Sustainable Home
6. Ultra-Luxury Residential Project of the Year
7. Interior Designer of the Year
8. Emerging Designer
9. Best Compact Home
10. Best Smart Home
11. Best Themed Project of the Year
12. Luxury Villa Project of the Year

Configurability Requirement

Categories must NOT be hard-coded into the application. Admin users must be able to add, edit, activate/deactivate and reorder categories, together with category descriptions, eligibility, questions, scoring criteria and upload rules.

8. Applicant Registration & Authentication

Field / Function	Requirement
Full Name	Mandatory
Mobile Number	Mandatory; OTP verification recommended
Email	Mandatory; verification recommended
Password	Mandatory; securely hashed
Confirm Password	Mandatory
Organisation / Firm	Mandatory or configurable
City / State	Mandatory
Terms Consent	Mandatory before account creation
Forgot Password	Email/OTP-based recovery
Session Security	Secure session management and logout

09. Nomination Portal – Multi-Step Workflow

Step	Stage	Purpose
Step 1	Applicant Profile	Applicant/organisation details.
Step 2	Select Category	Choose one or more eligible categories as permitted by award rules.
Step 3	Project / Professional Details	Category-dependent details.
Step 4	Design / Project Questionnaire	Structured questions and narrative responses.
Step 5	Upload	Project images, plans, drawings, portfolio and supporting documents.
Step 6	Preview	Read-only review of complete application.
Step 7	Declaration & Submit	Consent, declaration and final submission.

UX Requirement
Include a progress bar such as “Step 3 of 7”, Save & Continue Later, clear validation messages and a final review screen. Once submitted, the application should become read-only to the applicant unless Admin reopens it.

10. Media & Document Upload Requirements

Asset	Format	Quantity	Notes
Project Cover Image	JPG/JPEG/PNG	1	Required for project categories
Project Photographs	JPG/JPEG/PNG	Configurable	Multiple
Interior Photographs	JPG/JPEG/PNG	Configurable	Multiple
Exterior Photographs	JPG/JPEG/PNG	Configurable	Multiple
Floor Plans / Drawings	PDF/JPG/PNG	Configurable	Where applicable
3D Views / Renderings	JPG/JPEG/PNG/PDF	Configurable	Where applicable
Portfolio / Brochure	PDF	Configurable	Supporting material
Supporting Documents	PDF/JPG/PNG	Configurable	Admin-defined

- Maximum file size and maximum number of files must be configurable by Admin.
- Show upload progress and thumbnail preview where applicable.
- Allow Remove / Replace before final submission.
- Server-side MIME/type validation is mandatory; do not rely only on browser validation.
- Uploaded files must be stored outside public web root or behind secure access controls.

11. Applicant Dashboard

Feature	Requirement
Profile	View/update permitted applicant details.
My Nominations	List all draft and submitted nominations.
Status	Draft, Submitted, Under Verification, Eligible, Jury Review, Shortlisted, Winner, Rejected/Disqualified.
Continue Draft	Resume incomplete application.
View Submission	Read-only application and uploaded material after submission.
Nomination ID	Unique ID displayed for each submitted nomination.
Acknowledgement	Print/download submission acknowledgement.
Notifications	Display important system messages/status changes.

12. Jury Management & Evaluation Portal

A separate role-based Jury Portal is recommended so jury members can securely review assigned nominations without seeing confidential information belonging to other jurors.

Function	Requirement
Jury Login	Unique credentials; optional 2FA recommended.
Assigned Entries	Only applications assigned to the jury member are visible.
Entry View	Applicant/project profile, narrative, images and approved supporting documents.
Scoring	Configurable criteria and numeric scale.
Comments	Confidential jury comments.
Save Progress	Save evaluation and return later.
Final Submit	Lock evaluation after final submission.
Conflict of Interest	Optional declaration before scoring an entry.
Confidentiality	No visibility of other jurors' scores/comments.

13. Reports & Data Export

Report	Filters / Fields
All Nominations	Nomination ID, applicant, category, city, date, status.
Category-wise	Category, applicant/project, status.
City/State-wise	City, state, count and applicant details.
Pending Verification	Application age, applicant, category, missing/clarification items.
Shortlisted	Category, applicant/project, shortlist status.
Jury Scores	Entry, criterion scores, weighted total – restricted to authorised Admin.
Winners	Category, winner, project, publication status.

- Export formats: CSV and Excel. PDF export may be added for selected application/acknowledgement documents.

14. Security & Privacy Requirements

- HTTPS/SSL mandatory across the entire portal.
- Passwords must be securely hashed; never store plain-text passwords.
- Role-based access control for Applicant, Verification, Admin and Jury roles.
- Admin/Jury accounts should support strong-password policy; 2FA is recommended.
- Secure file upload validation and malware scanning where infrastructure permits.
- Private documents must not be publicly accessible by predictable URLs.
- Rate limiting / CAPTCHA for registration, login and public forms.
- Protection against SQL injection, XSS, CSRF, brute-force login and insecure direct object references.
- Database and file backups with defined retention policy.
- Audit logging for sensitive admin actions, score changes and status transitions.
- Privacy policy and consent capture must be implemented before collecting personal data.

15. Suggested Technical Integrations

Integration	Priority	Notes
Email Service	Must	Transactional emails for registration, submission and status.
SMS / OTP	Recommended	Mobile verification and critical status alerts.
WhatsApp	Optional	Useful for nomination reminders and shortlisted/winner communication; subject to approved provider/API.
Analytics	Recommended	Traffic, CTA, form-start and submission funnel measurement.
Cloud/Object Storage	Recommended	Scalable storage for project images and documents.
Payment Gateway	Optional	Only if a nomination fee/package model is approved.

16. High-Level Acceptance Criteria

- A new user can register, verify and access the nomination dashboard.
- An applicant can start a nomination, save it, log out and resume it later.
- Category-specific questions and upload requirements appear correctly.
- Mandatory fields and required files are validated before submission.
- Successful submission generates a unique Nomination ID and acknowledgement.
- Admin can search, filter, view and update nomination statuses.
- Admin can configure categories without developer code changes.
- Admin can assign nominations to jury members.
- Jury members can score only their assigned entries.
- Jury scores and comments are confidential and access-controlled.
- Admin can shortlist entries and manage winners.
- Public winners can be published/unpublished from the admin panel.
- Reports can be filtered and exported.
- The portal works correctly on desktop and mobile.
- Security, backup and file-access controls are implemented before production launch.

17. Expected Developer Deliverables

- Responsive public website
- Applicant registration/login and dashboard
- Dynamic nomination engine
- Secure file upload/storage
- Admin dashboard
- Jury portal
- CMS
- Notification templates and integrations
- Reports/export
- Production deployment
- Source code and deployment documentation
- Database schema/documentation
- Admin user manual
- Basic technical handover documentation
- Backup and recovery configuration

18. Conclusion

Recommended Architecture

Build the platform as a configurable Award Management System rather than a one-time nomination website. The 2026 edition should be the first configuration of a reusable awards engine. This will reduce future development cost and allow Kutchmitra to reuse the platform for subsequent Home & Decor Awards editions.

The first production release should prioritise the nomination funnel, applicant dashboard, admin verification, jury evaluation and secure media handling. Public content should remain CMS-driven so that the organising team can make changes without depending on developers.

Thank You
